Planning to enjoy time by the lake this summer? A Secchi disk reading only takes a few minutes and is a great way to ensure that your favorite lake remains a healthy body of water. Plus, everyone can participate!

Starting in the United States, **the Secchi Dip-In** (which takes place in July each year as part of **Lakes Appreciation Month**) is now an international effort in which volunteers produce a “snapshot” of water transparency around the world. Secchi disk readings can be submitted online at www.secchidipin.org or via the **Lake Observer** mobile app (<https://www.lakeobserver.org>).

Sponsored by the North American Lake Management Society (NALMS)
